

Can't vs. Won't: Working with Challenging Behaviors

Course Description

This course introduces Medicaid providers to the Skill Deficit Approach as a way to interpret a child's inability to perform a task.

Course Objectives

Upon successful completion of the on-line course "Can't vs. Won't: Working with Challenging Behaviors" the participant will have received a score of at least 80% on the Post Test. To attain this score the participant will have a general understanding of:

- Prevention as a proactive approach to managing behavior
- The Skill Deficit Theory
- Techniques to use to get past the upset moment
- Assessing and addressing skill deficits
- The difference between discipline and punishment
- The role of problem solving
- Teaching the new skill
